EDUCATION

Kyoto University

Master of Informatics

Kyoto, Japan

Oct. 2025 – Present

Jilin University

B.Sc. in Computer Science and Technology; GPA: 3.92/4.00 (93/100)

Changchun, China

Sep. 2021 – Jun. 2025

AWARDS & ACHIEVEMENTS

The ICPC International Collegiate Programming Contest Regional: Gold Medal

Northeastern China Collegiate Programming Contest: Champion

International Genetically Engineered Machine (iGEM) Competition: Silver Medal

China National Scholarship: CNY 8000, Top 0.2% nationwide

Monbukagakusho Honors Scholarship: JPY 48000/month

RESEARCH EXPERIENCE

Research & Development Division, LocationMind Inc.

Research Internship

Tokyo, Japan

Jul. 2024 – Oct. 2024

- Built data processing and feature engineering pipelines for mobility data, including GPS-based traffic flow and POI features, supporting multi-source data integration for downstream modeling.
- Developed data-driven models for urban flow estimation across major Japanese cities, covering pedestrian, bicycle, and vehicle traffic, significantly improving alignment with ground-truth traffic observations.

School of Artificial Intelligence, Jilin University

Undergraduate Research Assistant

Changchun, China

Jan. 2024 – Jun. 2025

- Conducted research on how large-scale events impact global shipping network structures using dynamic graph embedding. A manuscript was submitted to Ocean Engineering.
- Developed spatiotemporal traffic models for multi-agent simulation, implementing trajectory modeling techniques to capture interaction patterns and system-level traffic dynamics.

Gaoling School of Artificial Intelligence, Renmin University of China

Research Internship

Beijing, China

Aug. 2023 – Dec. 2023

- Applied large language models to structured data understanding tasks, including text-to-SQL, knowledge graph QA, and table QA.
- Improved text-to-SQL performance on the SPIDER dataset using LLaMA-based models through prompt design and model adaptation, outperforming previous baselines.

CERTIFICATES

Japanese-Language Proficiency Test (JLPT) N1: *Score of 163/180*

Test of English as a Foreign Language (TOEFL) iBT: *Score of 98/120*

SKILLS

Languages: Chinese (Native), Japanese (Fluent), English (Fluent)

Programming: Python, C/C++, SQL, Java

Technologies: PyTorch, TensorFlow, Scikit-learn, OpenCV, Pandas, GeoPandas, NumPy, Matplotlib, Git, Docker, MySQL, SQLite
